

Improving Children's Mental Health through School and Community Partnerships

Project Overview

Racine is 1 of 10 communities across Wisconsin funded by Advancing a Healthier Wisconsin Endowment at the Medical College of Wisconsin to improve behavioral health.

The eight-year project is focused on improving the social emotional health of elementary school students (4k-5th grade) in Racine Unified School District (RUSD).

Strategies

Increase opportunities for **parents** to learn about social emotional development

Create a **school** environment that supports students' social emotional health

Expand activities that intentionally improve social emotional health and development of elementary school **students** in RUSD

Improve coordination and **pathways** to mental health services for RUSD students

Community Partners

Community Agencies • Philanthropy • Human Services • Education • Law Enforcement • Healthcare • Early Childhood
