Completing Lab Work at the Racine Employee Health & Wellness Center

The Racine Employee Health & Wellness Center can be used for wellness exams, chronic disease management and many other services, including lab work. Please see below for billing and procedures for completing lab work.

- If an employee comes in for a lab that is ordered by the NP at the Health Center and it is on the lab list that was provided, there will no charge to the employee.
- If an employee needs a lab that is not on the list, the lab cost will be billed to their insurance.
- If an employee brings in a lab order that is ordered by an outside provider, the lab cost will be billed to the patient's insurance.
- Please ensure that if this is an outside provider lab; they have the ordering physician's name, location and fax number so results can be sent to their office upon result completion, usually within seven (7) days. Results will also be in the patient's Electronic Medical Record and available via the patient portal (through EPIC) for patient's to access.
- Lab work can be completed at the clinic by calling to schedule an appointment or by scheduling online at racinewellnesscenter.com and scheduling on the MA Lab/Immunization schedule.
