*Parking will be directed on site

FIELD DAY SPEAKERS

Jamie Patton is the Senior Outreach Specialist for the Nutrient & Pest Management Program at the University of Wisconsin-Madison. Her expertise is in soil health, soil science, nutrient management and cover crops.

Michelle Probst is a Natural Resource Educator serving southeast Wisconsin. She facilitates organizational development and strategic planning processes to develop, deliver, and evaluate programs related to conservation and water quality.

Adam Lasch is a leader in conservation efforts throughout southeastern Wisconsin. Adam and his wife, Betsy, are increasing their farm's resiliency through good stewardship practices that not only increase their profitability but also improve water quality and soil health.

Mike Stever is motivated by previous success he has had with cover crops and no-till practices. He will discuss efforts with other farmers so they too can find success in conservation efforts. Mike will talk about soil health indicators.

Jim Stute is an agricultural scientist. He will speak about the comparisons of regenerative agriculture versus conventional agriculture. Jim will share the agronomic plan for Case Eagle Park.

Marty Weiss implements innovative conservation practices on his farm. Marty runs a strip-till operation and interseeds a three species mix into corn. Marty will discuss his positive relationships with lake association members. Marty will also share information about pollinator habitats.

Chad Henderson is the Owner of Prime Ag Consultants, Inc. Chad graduated from University of Wisconsin with a Bachelor of Science Degree in Agricultural Economics. He has 20+ years as a licensed broker. Chad has authored several different nationally recognized market advisory newsletters; including the report rated number one for net soybean sales by Top Producer Magazine. Chad was raised on a cash crop grain and seed farm in southeast Wisconsin.
